## 1.0 Purpose

- 1.1 This document defines approved revision levels of Material and Process specifications used by Onboard Systems. This list is for supplier reference when performing processes or supplying raw materials. The approved revision levels apply when a specific revision level is not defined by purchase order or engineering drawing.
- 1.2 Also where relevant, newer superseded specifications are listed and considered acceptable substitutions or replacements for older, no-longer current specifications. Onboard Systems will accept certification for specifications listed as superseded when certification for a superseded specification was requested or called out on a drawing.
